JBT Marel Software

AXIN Machine Solutions and Connected Services

Optimize machine health, performance and service

AXIN Machine Solutions and Connected Services enable you to monitor, analyze, and optimize machine health and performance in real time—you can choose to act on insights yourself or rely on our experts to guide you to the best possible outcomes.

AXIN Machine Solutions combines two great legacies

AXIN Machine Solutions aligns both legacy OmniBlu and legacy SmartBase under the unified JBT Marel Software brand. For now, the change is in name only, with each legacy product continuing to operate as usual, providing machine insights, service offerings, and production insights for our customers.

Legacy OmniBlu as AXIN Machine Solutions include

- Remote machine monitoring – real-time connectivity and diagnostics
- Alerts and alarms of machine health events
- Digital maintenance manager and online parts portal
- Predictable maintenance costs
- Preventative maintenance plans
- Application training for your process
- Detailed service reports and priority recommendations
- Emergency support via phone or onsite
- Your own dedicated CSM

AXIN Machine Solutions vs processing challenges

The Challenge

> **We only find out there's a problem when the oven stops."**

Monitoring

AXIN Machine Solutions is built into equipment providing you with current and historical production data. Monitor machine health and performance continuously so maintenance teams can act before 'surprise faults or breakdowns.'

Legacy SmartBase as AXIN Machine Solutions include

Standard

- Current production data
- Machine health history for two weeks
- Alarm history two weeks
- Single Sign On

Premium

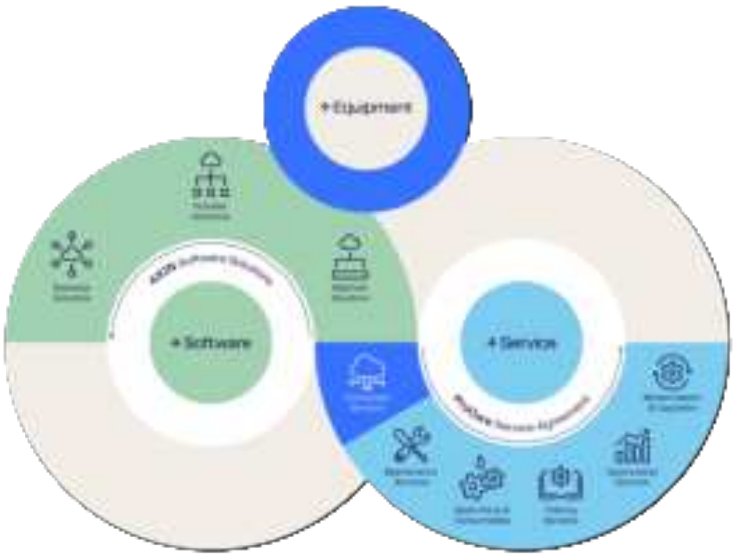
- Standard +
- One year of data history
- Additional data including cleaning and performance
- Performance comparison
- API data sharing

Connected Services

Powered by AXIN Machine Solutions, Connected Services links machine data and consultancy tools so we can deliver coordinated planning, proactive maintenance and responsive support through ProCare Service Agreement that ensures reliable performance and continuity through the continuous improvement program.

What Connected Services includes

- AXIN Machine Solutions Premium +
- Preventative maintenance
- Data analysis for root cause identification
- Data-driven maintenance models
- Proactive alert notifications on machine condition and performance
- Tailored consultancy reports
- Remote and on-site support
- Online training
- Continuous improvement program



JBT Marel Software

Connected Services powered by AXIN Software

Connected Services vs processing challenges

The Challenge

> **Unplanned maintenance on a further processing line is costly and disrupts the whole operation."**

Proactive maintenance

Connected Services enables a change from reactive to preventative maintenance to improve machine performance. Leading to higher productivity, predictable maintenance costs, and lower cost of ownership.
